

CAPINERA EVOLUTION

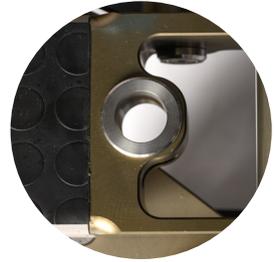

Cinotech
Italiana srl

About Capinera Evolution:

We call Capinera Evolution our lightweight dolly and not by chance. With an incredibly small weight of 120kg (264 lbs), this camera dolly is the ideal choice in case of smaller crews, smaller machines, smaller cameras and zooms.

Designing this model, we focused on few key features to allow Directors of Photography to achieve their goals with safety, freedom and a very small footprint. The limited weight does not impact on stability and arm movement, making the dolly much easier to carry in as many different locations as your production requests.

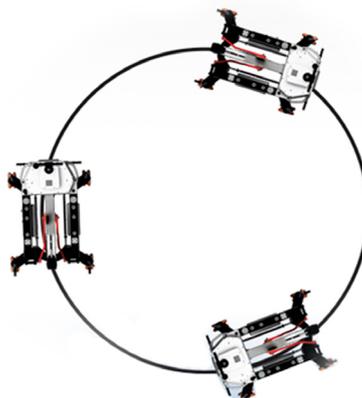

Capinera Evolution accessorized

SPECIFICATIONS

Dolly Weight (kg)	-
Length (cm)	(A) 126
Width (cm)	(B) 68

Battery powered	✓

STEERING MODES AND SPECIAL FEATURES

CONVENTIONAL

Rear wheels rotate 360°, while the front wheels stay locked in place.

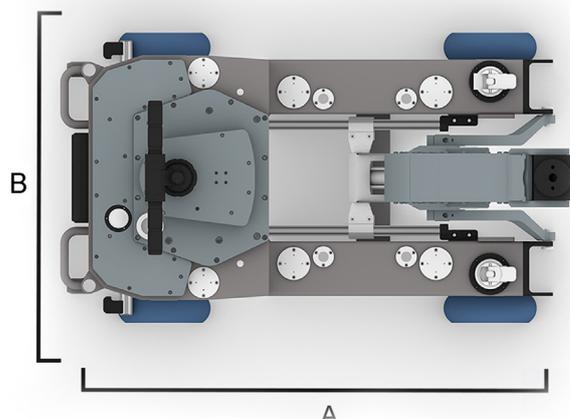

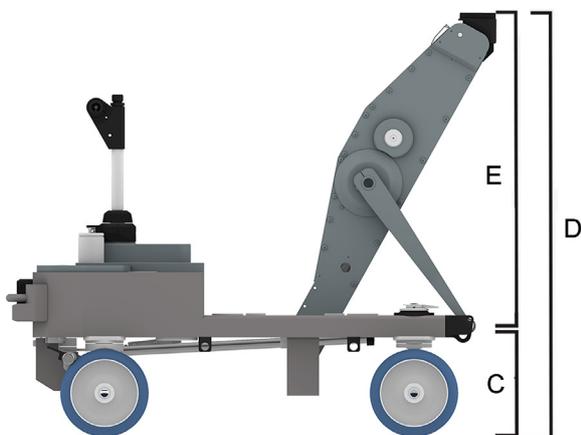

CRAB

Front and rear wheels rotate 360° in unison.

This dolly is equipped with a combined skate/rigid wheel system which brings an indisputable advantage compared to other ones known nowadays.

It allows an incredibly stable and smooth movement both on track and on its joints, and can be quickly moved from the ground to the track by simply adding the skate wheels, saving precious time on set.

Capinera Evolution dolly has an extremely efficient Power Supply system. Switching to 110V or 220V or 28V-powered battery makes the charging procedure easy and convenient.

ACCESSORIES

BASIC SET

Accessories:

Basic set of accessories

Code	Description
100011	Euromount (bazooka attachment)
100015	Adjustable Seat
100014	Pump-boom arm handle
