

# TRACK

**Cinotech**  
Italiana srl

## About our Tracks:

Our tracks are all made of stainless steel and a light aluminium alloy, so they are extra resistant and easy to carry.

We produce straight tracks that are 0.8, 1.6 or 2.2 metres in length and 0.62 metres (24.5 inches) in width.

Our 45-degrees curved track has a 20ft outside diameter so you will need 8 sections to make a full circle.

Albatross on curved track
